RIBBLE

ULTRALIGHT GO TO MARKET

Diagnosis + Strategy February 2025

RIBBLE

DOCUMENT PURPOSE

This document defines the GTM strategy for the Ribble series, aligning marketing, sales, and operations to ensure success in the endurance road bike category. It synthesises market insights and audience research to position the Ultralight as the benchmark for performance, comfort, and versatility. Key Deliverables of This Document:

- **Category Analysis**
  An overview of the market and a view of the competitive space
- **Audience Insights:**
  Detailed profiling of target customer segments, their needs, and their purchasing behaviours.
- **Market Positioning:**
  Articulation of the Ultralight's unique value proposition.
- **Strategic Guidance:**
  A clear framework for achieving awareness, consideration, and conversion goals for the Ultralight series.
- **Campaign Roadmap:**
  A phased plan for implementing marketing and communication activities.

RIBBLE

CATEGORY / COMPETITOR OVERVIEW

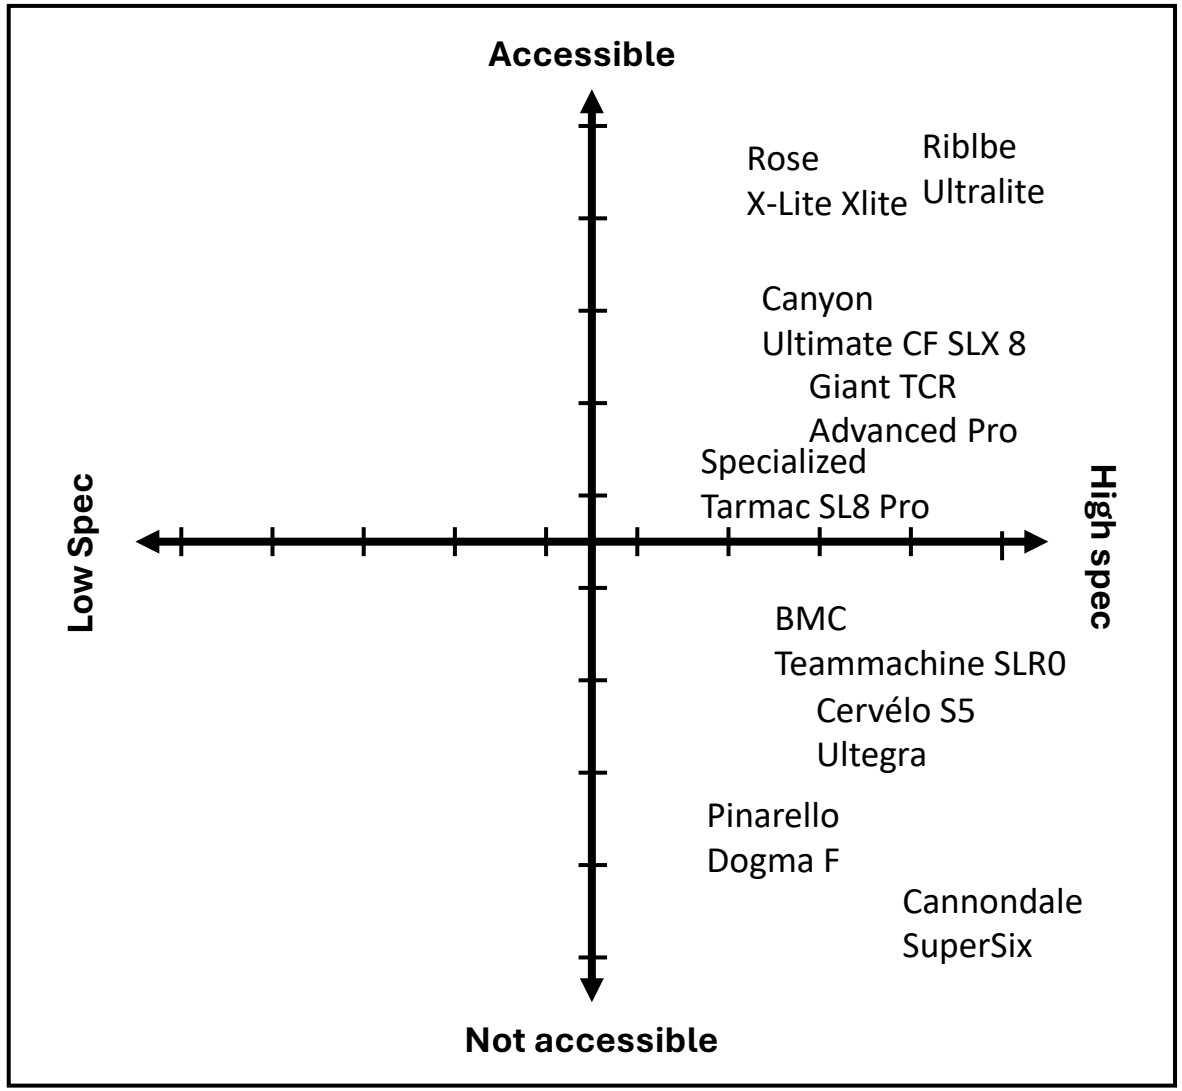
Bike Model	Model Year	Frame Material	Groupset	Wheelset	Approximate Price (GBP)	Manufacturer's Key Message	
Pinarello Dogma F	2024	Carbon	Shimano Dura-Ace Di2	Fulcrum Speed Wheels	£13,200	A frame that can climb, descend, and sprint with equal flair, used by top professionals for its versatility and performance.	Link
Cannondale SuperSix EVO Hi-MOD 1	2024	Carbon	Shimano Dura-Ace Di2	HollowGram 45 SL KNØT	£10,000	The all-new SuperSix EVO is a beautiful evolution of our classic race machine, offering more speed, better aerodynamics, and superior handling.	Link
Cervélo S5 Ultegra Di2	2024	Carbon	Shimano Ultegra Di2	Reserve 52/63	£9,000	The S5 has been redesigned to further enhance its aerodynamic performance, making it faster and more efficient, perfect for sprinters and speed enthusiasts.	Link
BMC Teammachine SLR01 FOUR	2024	Carbon	Shimano Ultegra Di2	CRD-351 SL Carbon	£8,499	Pure race vibes with absolute precision in handling and craftsmanship, making it the fastest bike in the test.	Link
Specialized Tarmac SL8 Pro	2025	Carbon	Shimano Ultegra Di2	Roval Rapide	£7,000	Engineered to be the fastest Tarmac ever, combining lightweight design with aerodynamic enhancements for top-tier racing performance.	Link
Giant TCR Advanced Pro	2025	Carbon	Shimano Ultegra Di2	Cadex	£6,500	A well-rounded race bike blending industry-leading composite frame engineering with fully integrated components to enhance climbing, cornering, and descending.	Link
Canyon Ultimate CF SLX 8	2024	Carbon	Shimano Ultegra Di2 RD-R8150 12s	DT Swiss ARC 1400 Dicut db	£6,000	Lightweight and stiff carbon fiber bike designed to dominate the competition with aerodynamic efficiency.	Link
Rose X-Lite Xlite 06 Ultegra Di2	2025	Carbon	Shimano Ultegra Di2	Rose RC Sixty Disc	£5,000	A lightweight race bike designed for top-tier performance, combining aerodynamics with a responsive ride.	Link
Riblbe Ultralite	New	Carbon	Shimano Ultegra Di2	Vision	£4,999	TBD	

CATEGORY / COMPETITIVE CLUSTERING

COMPETITIVE CLUSTERING:
Top Right (Accessible High Spec):
The Ultralight sits alongside Canyon Endurance and Rose Reveal, targeting value-conscious performance riders. It blends cutting-edge carbon tech, aero refinements, and low weight to maximize speed and efficiency

Bottom Right (High Spec, Not Accessible):
Premium models like the BMC Roadmachine and Specialized Roubaix Expert prioritize prestige and niche performance but come at a higher price.

KEY IMPLICATIONS:
1. **Value Leadership** The Ultralight is a category leader, offering elite-level aerodynamics and lightweight construction without the premium cost
2. **Versatility** Excels across disciplines, climbing, sprinting, and descending
3. **Price vs. Prestige** Offers a high-performance alternative to premium brands, appealing to riders seeking both status and substance
4. **Market Opportunity** Strong messaging around aerodynamics, materials, and race pedigree will reinforce its position as a disruptive force in the endurance road segment



RIBBLE

CATEGORY / ENDURANCE BIKES POSITIONING

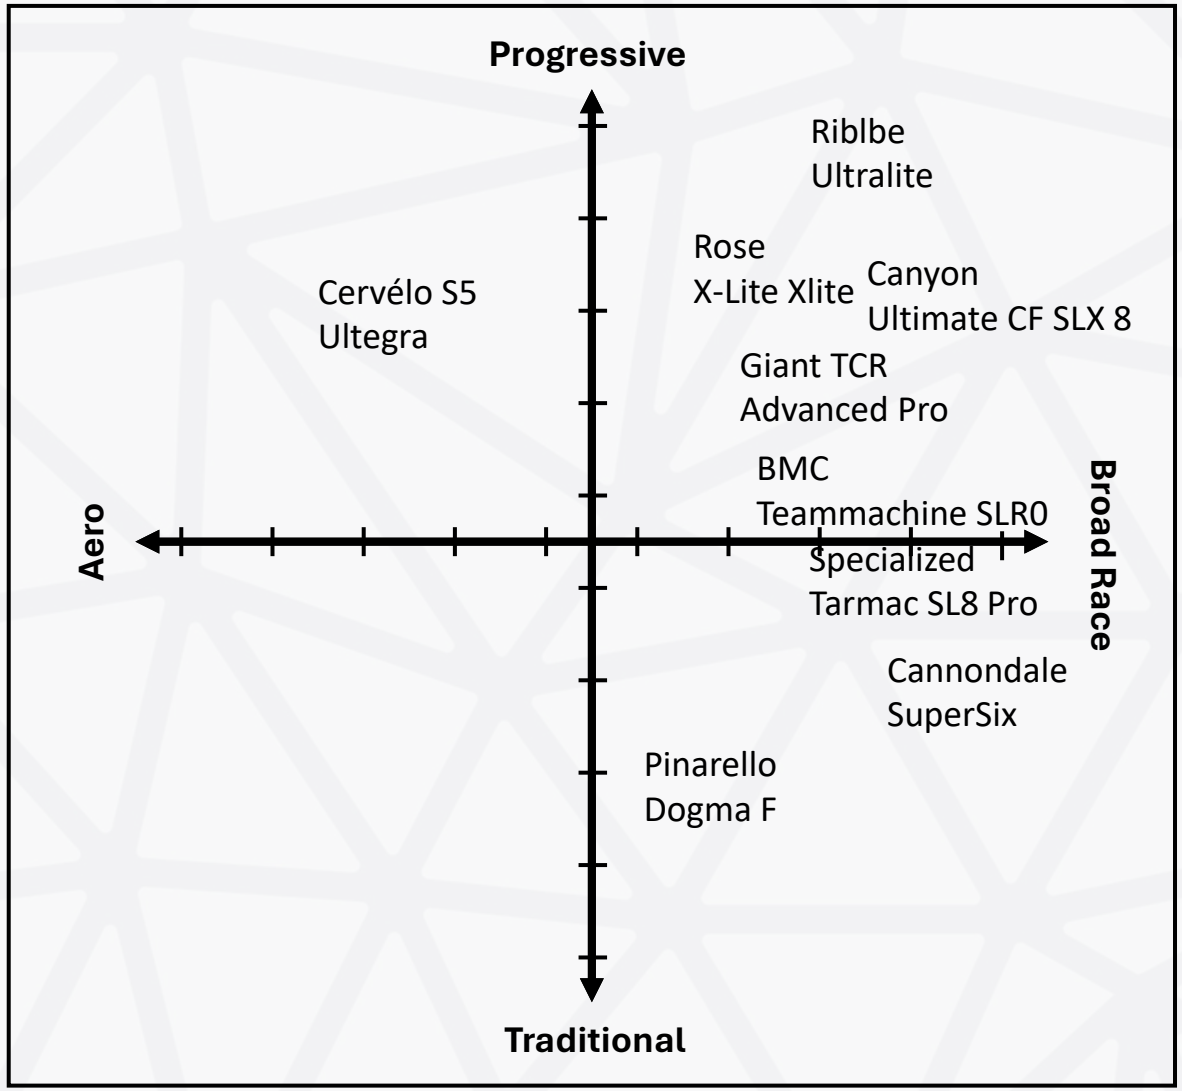
TREND DESCRIPTION
The crosshair analysis highlights market trends in road bikes positioned as general high end racing bikes. These bikes all focus on versatility and innovation. The Ribble Ultralight's position in the progressive and broad race quadrant reflects the bikes ability to excel in Sprint, Climb, and Endurance qualities, appealing to ambitious riders.

Competing models like the Canyon Ultimate and Rose X-Lite share this balance of speed and adaptability, while aero-focused bikes like the Cervélo S5 target specific demands. Traditional models like the Pinarello Dogma F and Cannondale SuperSix focus a little more on heritage performance, with premium options like the BMC Teammachine SL0 positioning engineering and quality.

IMPLICATIONS
Ribble should highlight the Ultralight's ability to climb, sprint, and descend, along with its aerodynamic and lightweight design. This positions it as a comprehensive race bike that delivers performance across all terrains, reinforcing its leadership in this category.

Many competitors use advanced carbon blends but fail to clearly differentiate their material science. Ribble can own this narrative and reinforce its innovation credentials.

While competitors may suggest specialism in one or two qualities, Ribble can differentiate by double downing on this in the messaging, dominating all three areas with evidence-based performance claims.



RIBBLE

CATEGORY / BRAND PENETRATION

OBSERVATIONS

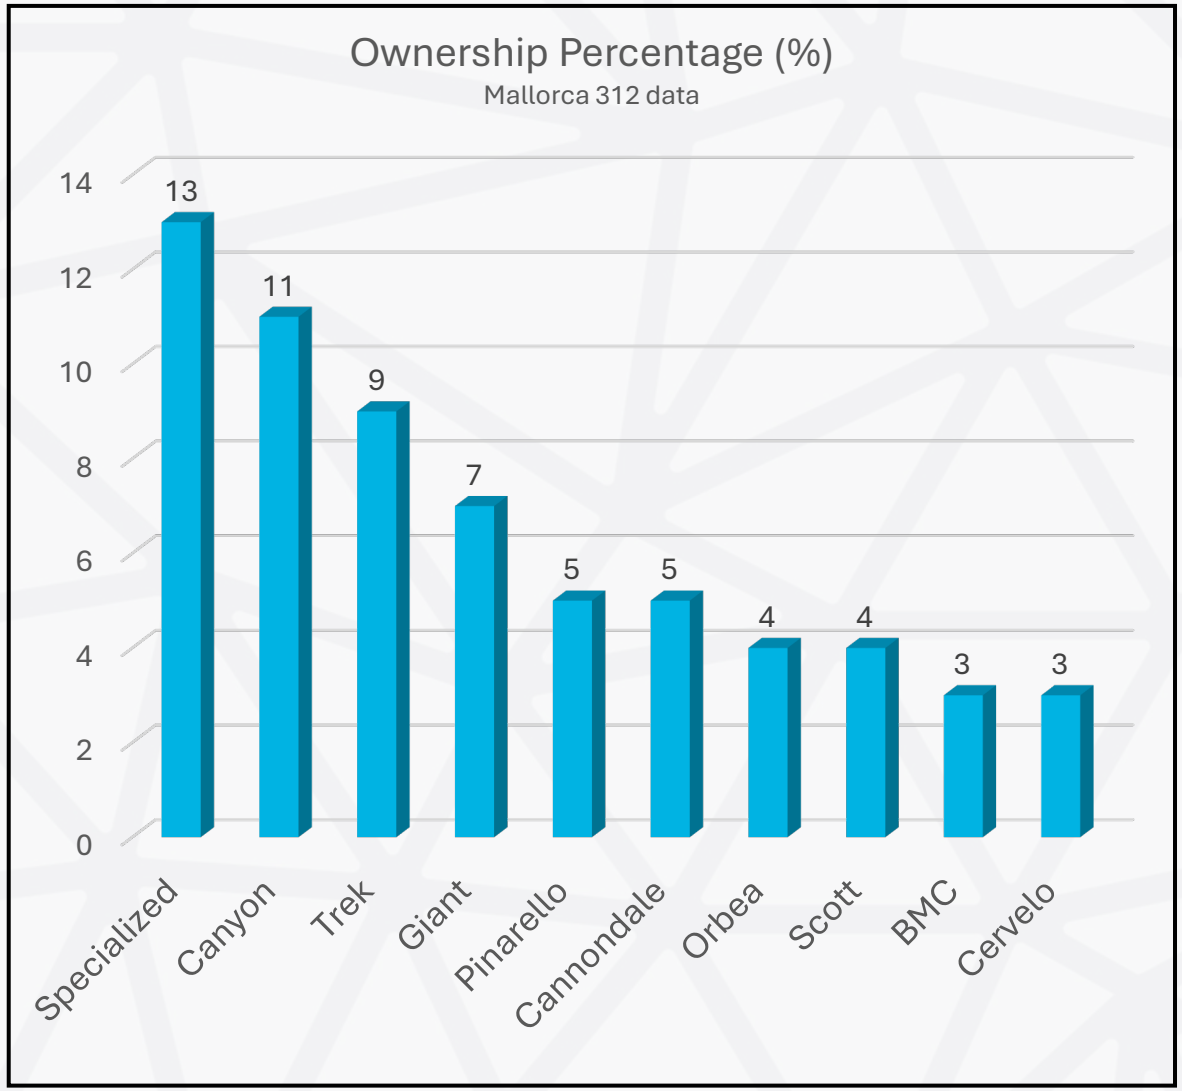
We do not have access to brand ownership by country, so this data is only partly relevant, but the top three owned brands for Mallorca 312 participants are Specialized, Canyon and TREK. These three account for 53% of total ownership.

Of these three Canyon is the only brand known for a strong value Vs quality positioning, but it has moved away from this over the last five years. They are also the only predominantly DTC brand in the list.

IMPLICATIONS

Target Prospects with Competitive Messaging

- Focus on Specialized, Canyon, and Trek and highlight how the Ultralight is the Ultimate all round race bike. Make bold and explicit claims in the three chosen areas.
- Position Ultralight's technology as "simply better", by creating a clear and understandable story around the martials technology.
- Create marketing materials that compare the Ultralight's positioning and price, highlighting the value, quality and spec balance



RIBBLE

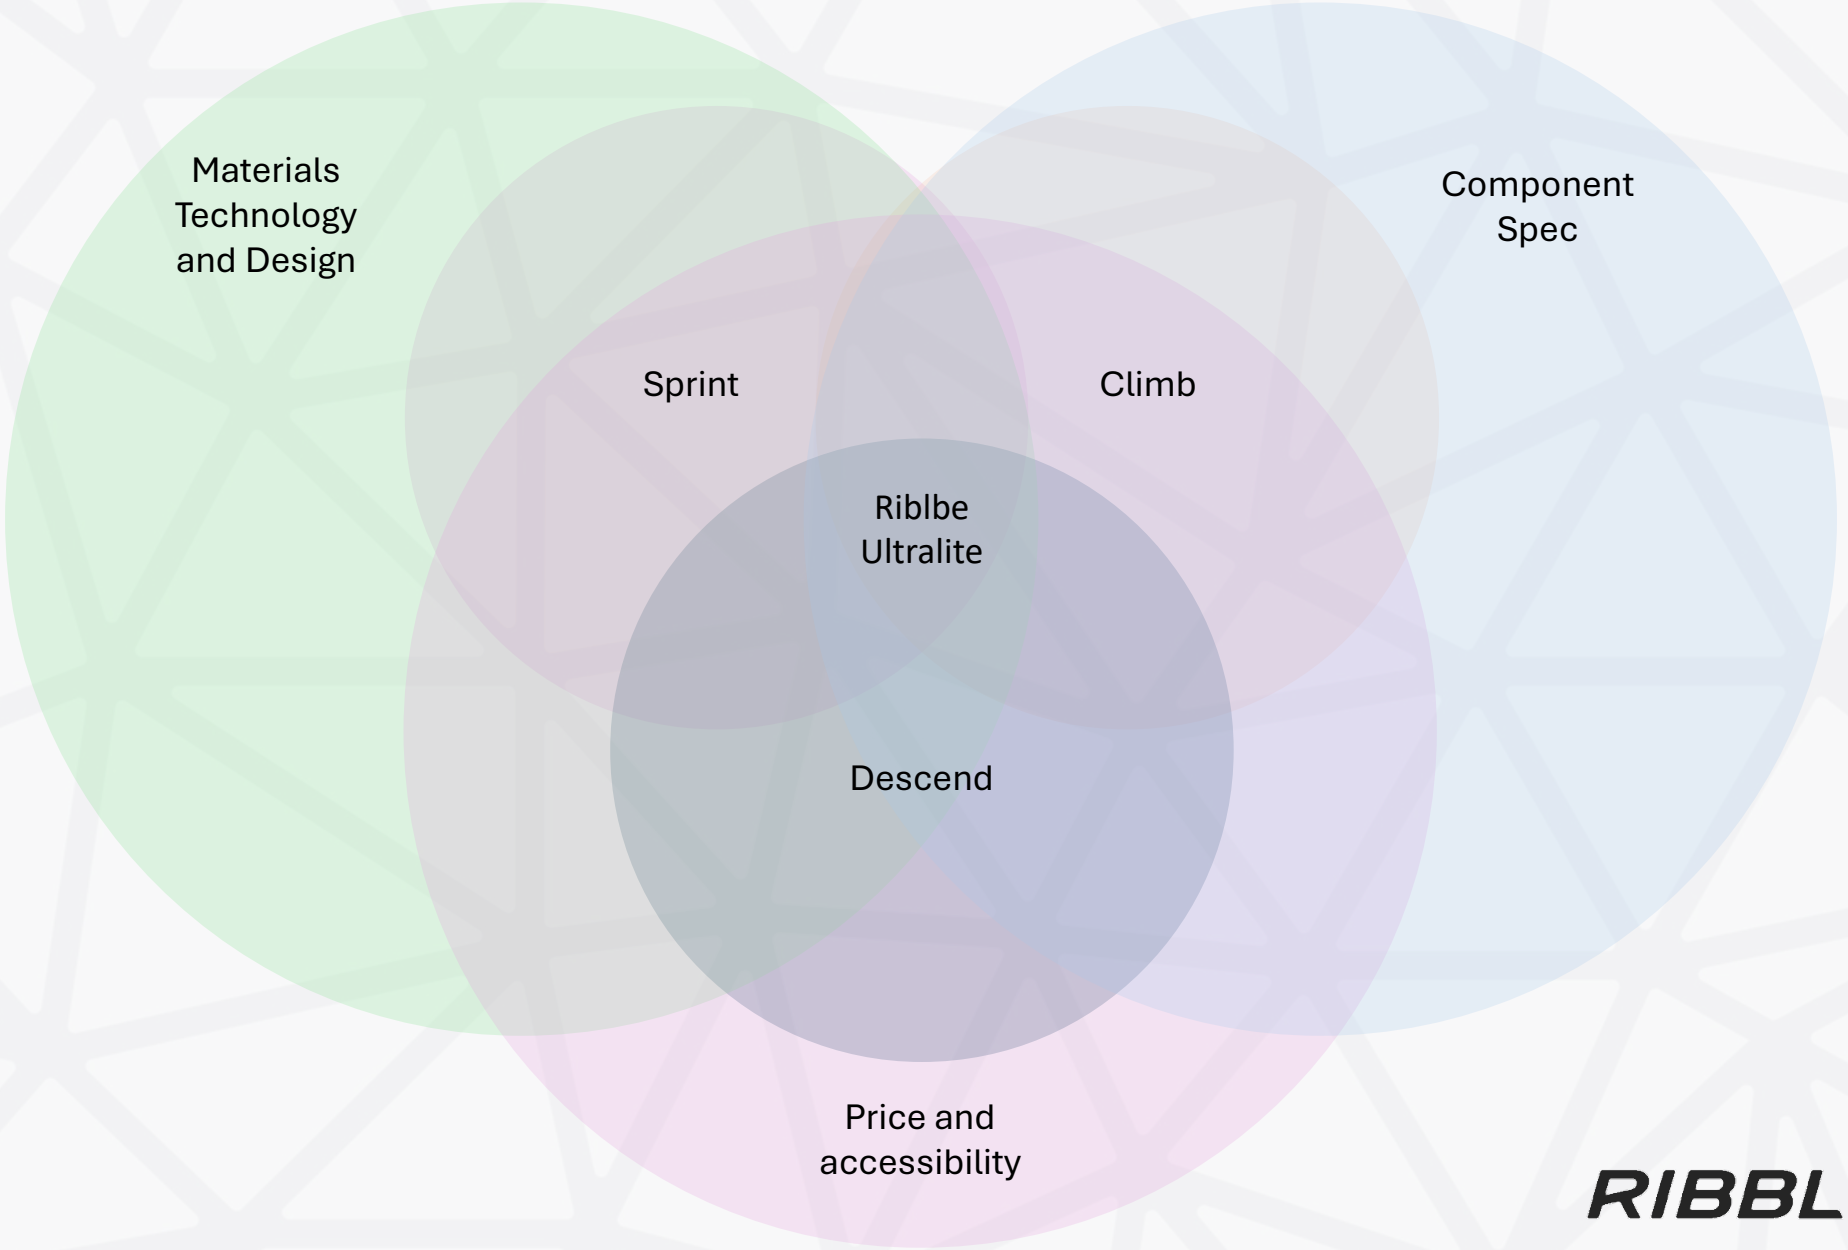
CATEGORY / BRAND PENETRATION

THE DOUBLE / TRIPPLE THREAT

The Ultralight is sat in the centre of six compelling product Narratives

Price
Spec
Materials and Design

Climb
Sprint
Descend

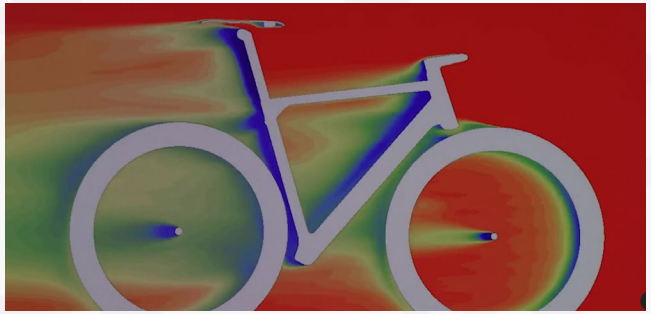


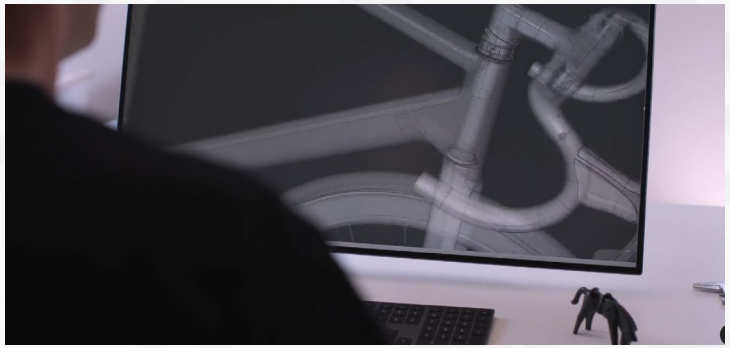
RIBBLE

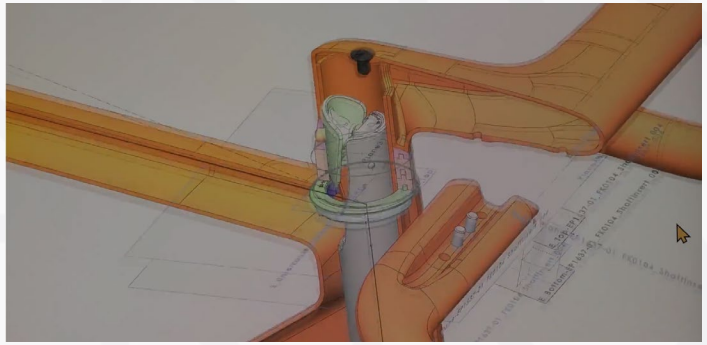
CATEGORY / CANYON OFFER LEARNINGS FOR BRAND GROWTH

Canyon Ultimate

- Obvious and intuitive navigation and funnel entry points and progression.
- Strong, emotionally lead supported by pro endorsements.
- The category pages lead with strong, clear and easy to understand technical message, delivered through video.
- USP's communicated using enriched techniques such as 3D animations
- Key visuals and creatives communicate USP's supported by strong RTB's clearly
- Lifestyle is a second priority, but still well delivered.



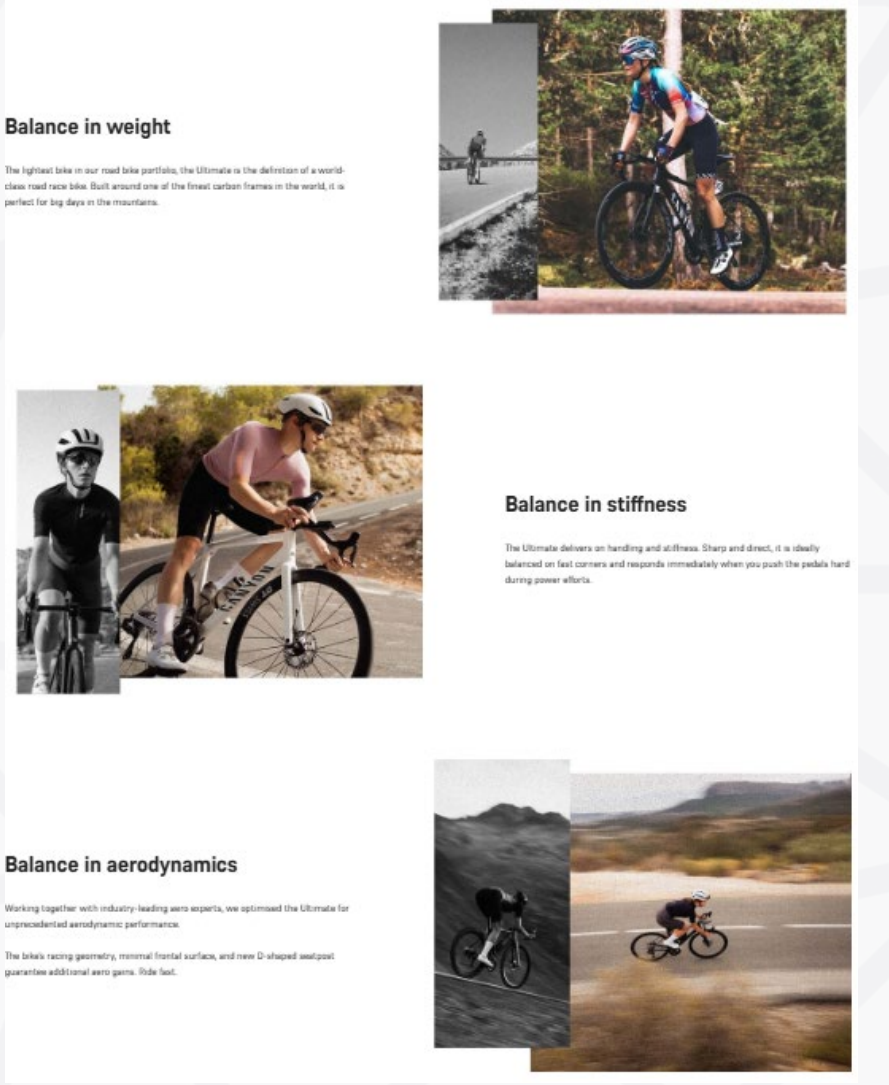


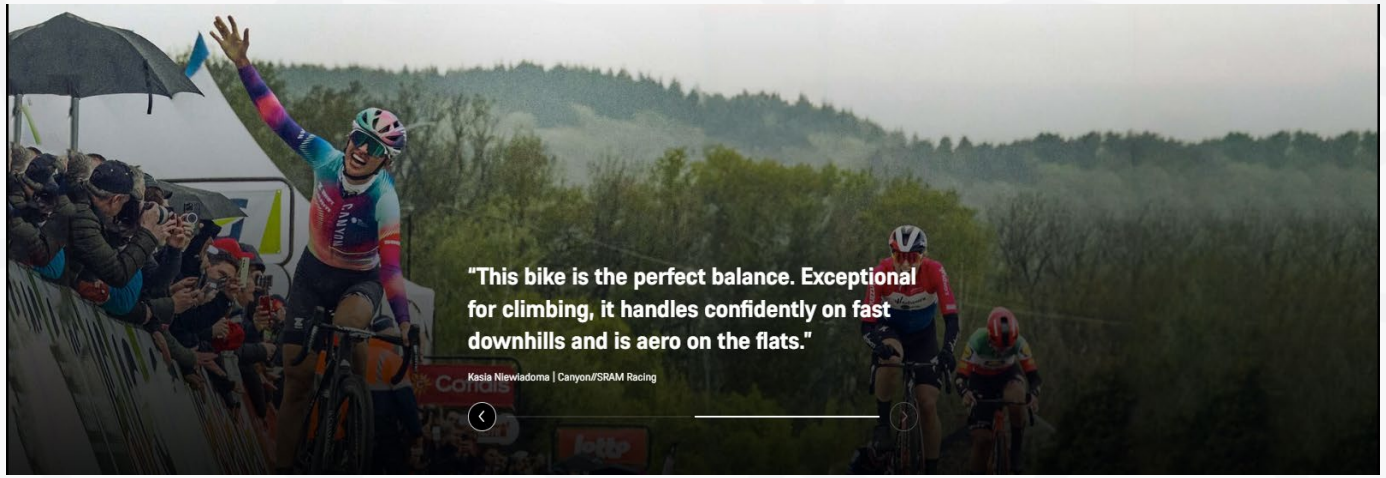


RIBBLE

CATEGORY / CANYON OFFER LEARNINGS FOR BRAND GROWTH

Canyon Ultimate





RIBBLE

GENERAL RESEARCH OBSERVATIONS

INTERNAL AND INSTINCTIVE / BIKE TRACK OBSERVATIONS

- **Road Cycling Leads Sales Intent**
  More survey respondents considered purchasing a road bike in the next three months than any other type of bike, particularly among competitive and challenge-focused cyclists. Over half of competitive British cyclists were planning a road bike purchase

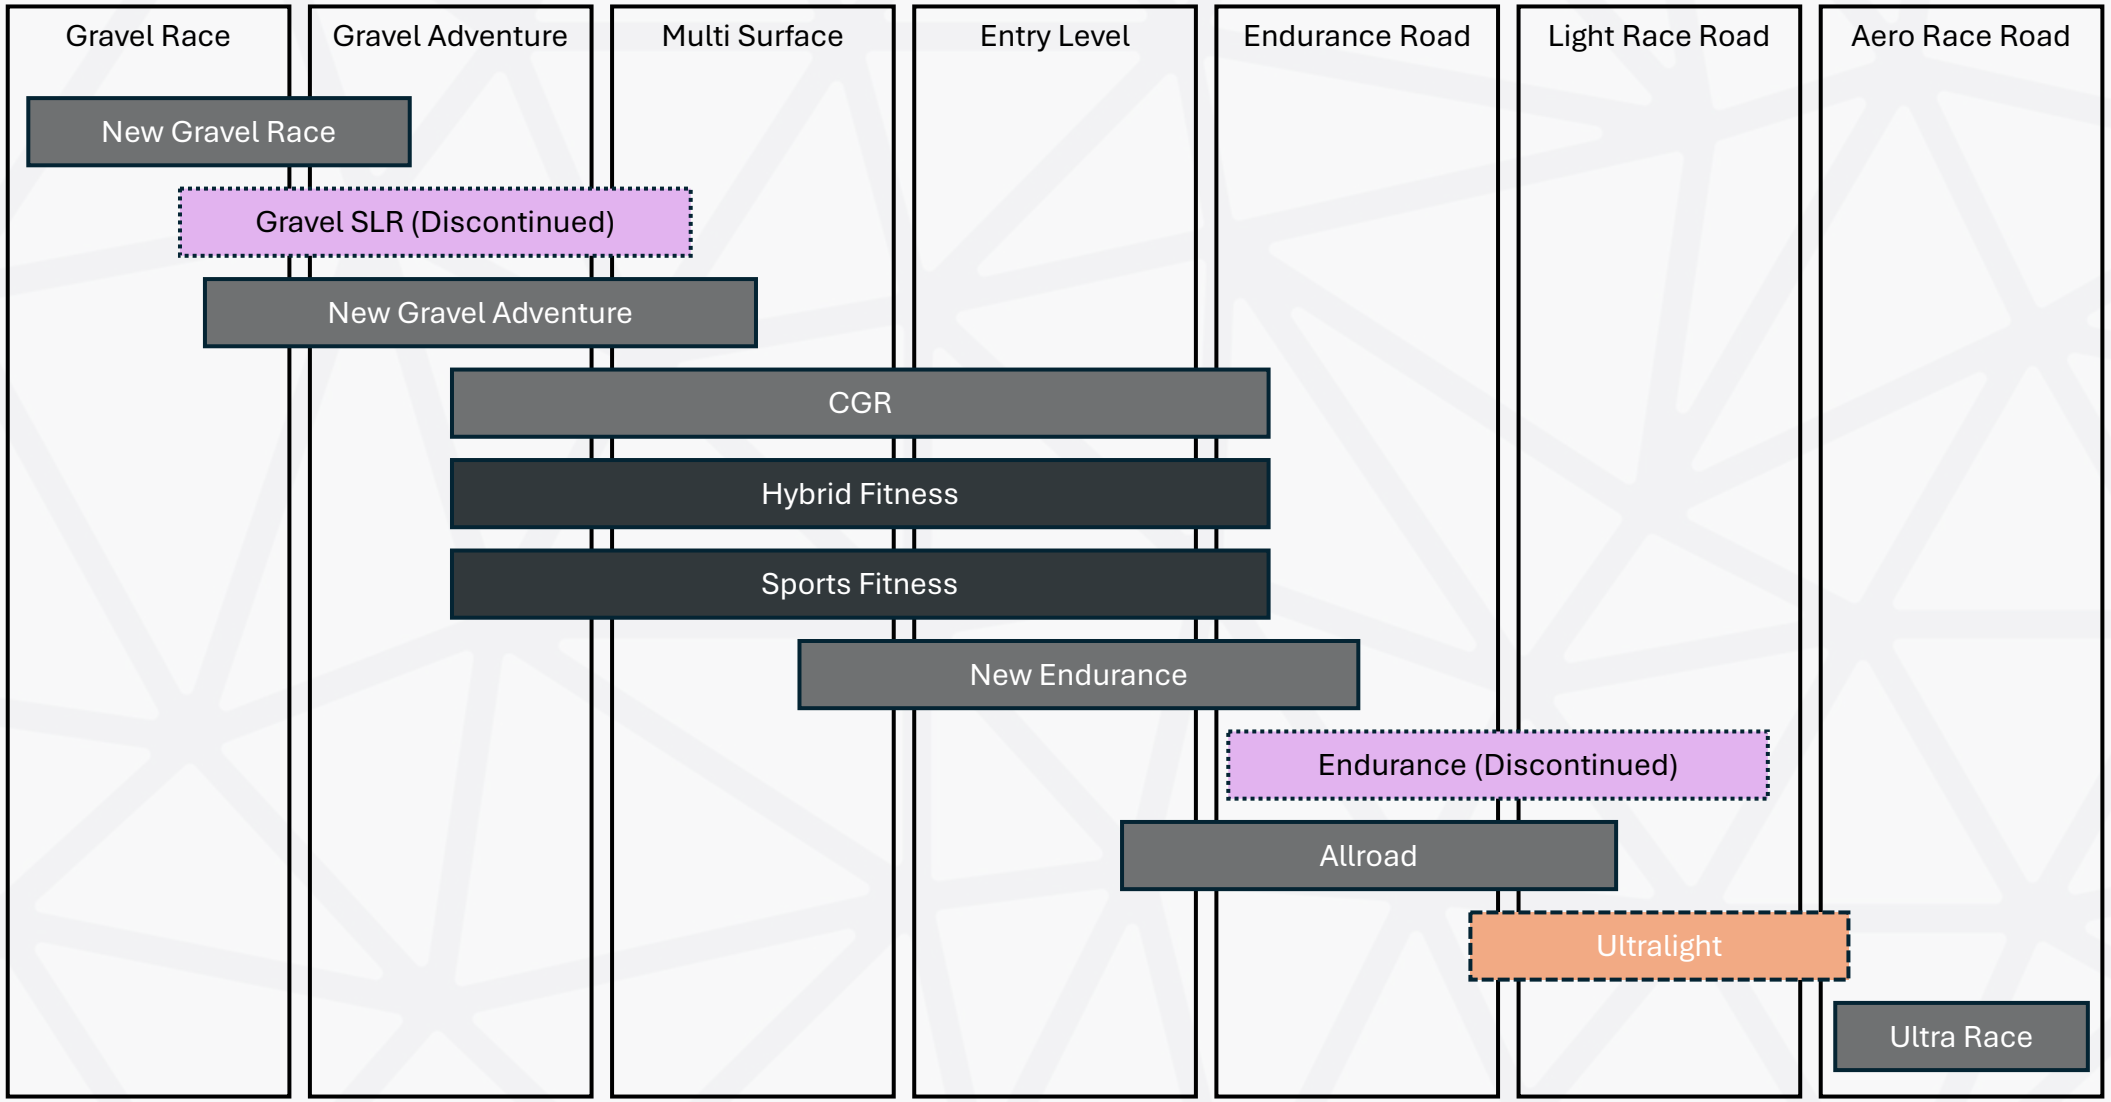
- **Competitive Cyclists Drive Demand**
  Competitive cyclists remain the most likely to plan purchases of new bikes and accessories. Their commitment to performance and racing leads them to prioritize high-end road bikes, indoor training equipment, and even electric mountain bikes

- **Preference for New Over Used**
  A strong preference for brand-new road bikes exists, especially among competitive cyclists. In the UK, 64% of those planning a road bike purchase intended to buy new

- **Competitive Cyclists Shape the Market**
- Riders who train for races or personal bests are the most engaged buyers, spending more on accessories and upgrades. Future's cycling readers (likely performance-oriented) were three times more likely to buy a new road, mountain, or e-bike than casual cyclists

RIBBLE

RIBBLE RANGE ARCHITECTURE



CATEGORY / OBSERVATIONS & OPPORTUNITES

KEY OBSERVATIONS	IMPLICATIONS AND OPPORTUNITIES
Riders who train for racing or personal bests drive high-end bike purchases, preferring new over used bikes	Focus marketing on performance-driven messaging, emphasizing Ultralight's UCI approval, elite carbon technology (Mitsubishi 65T fibers), and wind-tunnel-tested aerodynamics.
Weight and stiffness are critical factors for racers, with frame weight and power transfer being key decision drivers	Lead with Ultralight's sub-775g frame weight, race-focused stiffness, and precision handling, ensuring it is positioned as the lightest, fastest race bike in its class.
Specialized, Canyon, and Trek hold 53% of market share among performance cyclists, with Canyon leading in value-focused racing bikes	Disrupt the category by emphasizing the Ultralight's performance at a more accessible price, making it the best value premium race bike.
Advanced carbon blends are widely used, but few brands effectively communicate their technology in a way that resonates with riders	Own the material innovation narrative by making Mitsubishi 65T carbon the hero, explaining its real-world performance benefits in stiffness, weight savings, and power transfer.
Canyon has successfully positioned itself as a DTC leader, offering high-performance bikes at lower prices	Leverage Ribble's DTC model by offering a high-value race bike with direct-to-consumer customization
Riders want the speed advantages of an aero bike, but without sacrificing weight or versatility	Position Ultralight as the "triple threat" race bike, dominating climbing, sprinting, and descending, bridging the gap between pure aero and ultra-lightweight race bikes.
Competitor brands utilize pro team endorsements, CFD testing, and race wins to validate performance	Utilise Jamie Burrow and real-world race testing to reinforce the credibility and race pedigree of the Ultralight, ensuring riders trust its competitive edge.

RIBBLE

CATEGORY ANALYSIS

Ribble Performance Analysis

RIBBLE

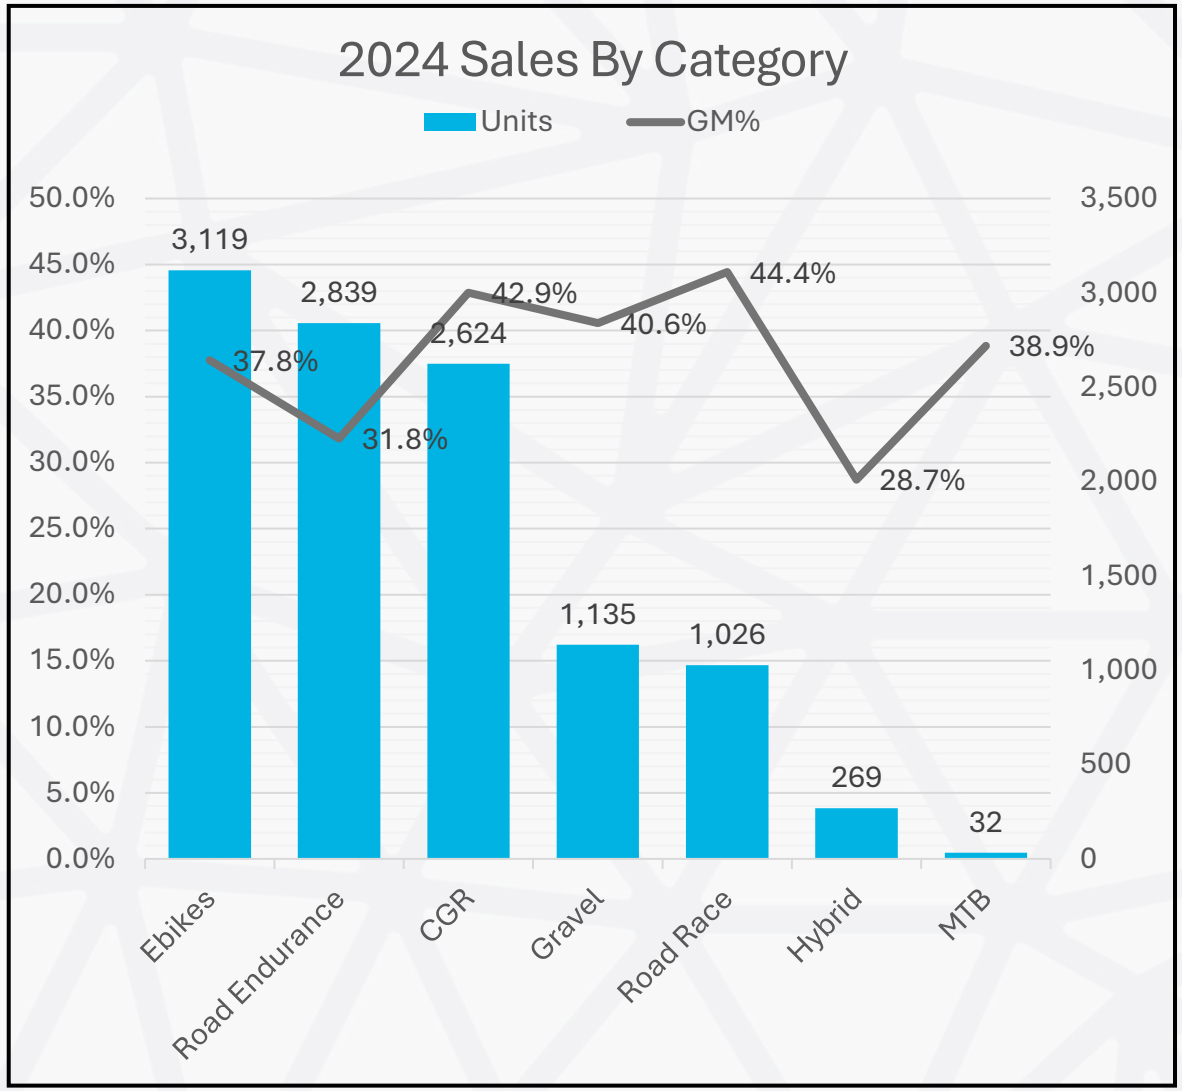
RIBBLE CATEGORY PERFORMANCE 2024

SALES VS MARGIN BY CATEGORY
The chart shows unit sales and gross margin percentage (GM%) by category for 2024.

OBSERVATIONS
Sales Volume:
- Road Endurance bikes have the second-highest unit sales (2,839), just behind blended eBike sales (3,119).
- This reflects strong demand and a significant market share within Ribble's portfolio.

GM
- Road Endurance GM% is 31.8%, the second lowest margin among all categories. This was due to sale activity to make way for new models in 2025.
- Model fatigue, the lack of a clear endurance specific model, market competition and exiting older models also contributed to the lower GM in this category.
- All of these factors could also be impacting unit volume

OPPORTUNITIES
- Explore pricing sweet spots for the endurance road category without distressing the brand through promotions



RIBBLE

AUDIENCE / THERE ARE THREE BROAD CATEGORIES OF HIGH SPENDING RIDER

TT, TRI, RACE	ROAD ENDURANCE	GRAVEL	MTB

Competitor (TT, Tri, Crit, Gravel Race, CX, MTB XC, MTB Enduro) (A)

Who are they? Pros, Amateur racers and hard-riding 'big eventers' across a range of ages. They keep up to date with professional racing and will likely follow some leading professional and locally influential riders on social media.

How do they ride? Hard training and event focused cyclists. Cycling, for them is about pushing themselves and improving their performance. Measured against others, or against themselves.

Attitude to product ? Willing to pay for performance gains. Technical ability varies, but keep up to date on new technologies

Premium Product Enthusiasts (Road, Gravel, MTB Trail) (B)

Who are they? Affluent cyclists who ride regularly and are able to maximise their enjoyment of their cycling by investing in the best equipment. Some may be deeply connected to cycling culture, others may have been drawn in by others that they know and ride with.

How do they ride? Whilst they ride regularly and some may ride very long distances, and they will push themselves, they don't ride to win. They ride because it's gives them balance and joy in their life.

Attitude to product? Wide variety of technical knowledge. Major purchases are a personal reward, much like a Swiss watch. They want performance that they can live with and is a joy to ride, similar to a great sports car.

RIBBLE

AUDIENCE / BIG DREAMS / LIMITED REALITY

TT, TRI, RACE	ROAD ENDURANCE	GRAVEL	MTB

LIFESTYLE BUYERS (C)

Who are they? These are individuals inspired by cycling into complement their broader lifestyle or fitness routine. They may be stepping onto a bike as part of their fitness mix, coming from the gym, or even thinking about training for a sprint triathlon. While cycling isn't their primary activity, they see it as a rewarding and aspirational way to stay active and explore new challenges.

They dream big. Brought into the hype and excitement of what's possible, they have extraordinary goals and ideas about how they will pursue their cycling journey. They align themselves with what the professionals and seasoned enthusiasts do, but their outcomes are likely limited by their personal life and ability to commit.

How do they ride? Cycling is "one of" their activities rather than the centre of their routine. They may use the bike for leisure outings, fitness cross-training, or as part of occasional group rides. For some, it's a way to add variety to their fitness regimen, while others see it as a stepping stone toward exploring the sport further.

Attitude to product ? They want to invest in high-quality, authentic equipment that signals they are serious about their activities. It's crucial that they don't come across as "all the gear, no idea." This group values a brand that positions itself as authentic and credible, appealing to "real cyclists" rather than casual poseurs. They are drawn to products that balance functionality with the aspirational image of cycling, offering both performance and style.

RIBBLE

AUDIENCE / COMPETITOR AND ENTHUSIAST

WHO ARE THEY?

- Competitive road cyclists who train (or plan to train) rigorously and aim to achieve personal bests or dominate segments on platforms like Strava.
- Riders drawn to the latest innovations in lightweight and aerodynamic technology.
- Typically middle-aged with high disposable incomes, valuing premium quality and prestige in their equipment.
- They want bikes that enhance performance and signal their commitment to speed and racing ethos.

WHAT DO THEY OWN?

- Own multiple bikes. It's possible they have a dedicated aero, climbing, or endurance race bikes.
- Bikes are equipped with advanced electronics like power meters, bike computers, and electronic shifting (e.g., Shimano Di2 or SRAM eTap).
- Likely to invest in lightweight wheelsets and carbon components for competitive advantages.
- May choose to customise their bikes for pro aesthetics and marginal gains.

HOW DO THEY RIDE?

- Ride 3–5+ days a week, including structured indoor training and group rides focused on speed.
- Likely participate in competitive events like sportives or road races, certainly pushing their personal limits in informal settings.
- Enjoy the challenge of sprinting, climbing, and descending, seeking thrills and testing performance across varied terrains.
- Track performance obsessively, focusing on aerodynamics and speed gains.

BARRIERS – SOLUTIONS?

Barrier: Perception of Ribble as less premium than brands like Specialized or Canyon.
Solution: Highlight innovation in carbon tech, aerodynamics, and race-proven design.

Barrier: Riders' tendency to stick with familiar high-end brands for prestige.
Solution: Offer superior value with performance that rivals top-tier competitors at accessible pricing.

Barrier: Demand for tangible racing results and clear performance benefits.
Solution: Use data-driven proof points and endorsements from riders or racing teams.

Ultralight FEATURES?

- Engineered for maximum aerodynamics and lightweight performance.
- Precision-crafted carbon construction designed to excel in climbing, sprinting, and descending.
- Tested and optimized for race conditions, leveraging cutting-edge technology to deliver elite performance.
- Offers customization options for riders to personalize their race machine while maintaining the aesthetics of a true competitor.
- A disruptive all-around race bike that redefines value in the high-performance road segment.

RIBBLE

AUDIENCE / ASPIRATIONAL / BIG DREAMS / LIMITED REALITY

WHO ARE THEY?

- Individuals inspired by competitive cycling but not yet fully immersed in it. They dream of achieving personal bests, setting records, or competing in events like sportives.
- Drawn to premium equipment for its performance and the status it conveys, even if they aren't fully utilising its capabilities.
- Typically professionals or fitness enthusiasts with disposable income, looking to invest in high-quality, aspirational products.

WHAT DO THEY OWN?

- A mix of mid-range and high-end bikes.
- Likely equipped with bike computers, electronic shifting (e.g., Shimano Di2 or SRAM eTap), and lightweight carbon components for the appearance of serious riding intent.
- May own accessories like aero helmets and power meters, purchased for their alignment with elite-level cycling.
- Often customise their bikes to reflect their personality and aspirations.

HOW DO THEY RIDE?

- Ride 1–3 times per week, typically blending leisure rides, fitness training, and occasional group outings.
- Participate in sportives or charity rides but often ride solo to test themselves and enjoy the freedom cycling offers.
- Motivated by the thrill of owning premium equipment and using it to push personal limits, whether climbing hills, sprinting, or setting KOM attempts.
- Tend to value the emotional connection with their equipment

BARRIERS – SOLUTIONS?

Barrier: Ribble is perceived as less prestigious compared to more established premium brands.
Solution: Focus on innovation and cutting-edge technologies like Mitsubishi 65T carbon fibres, UCI approval, and wind-tunnel-tested aerodynamics to elevate the brand's credibility.

Barrier: Aspirational riders may feel overwhelmed by overly technical or performance-driven branding.
Solution: Simplify messaging to show how the Ultralight combines elite performance with accessibility, making it ideal for their goals and aspirations.

Barrier: Lack of tangible racing experience or clear results to justify their investment.
Solution: Leverage rider testimonials, data-driven performance metrics, and relatable stories from other aspirational buyers to connect with this audience emotionally.

Ultralight FEATURES?

- Engineered for maximum aerodynamics and lightweight performance.
- Precision-crafted carbon construction designed to excel in climbing, sprinting, and descending.
- Tested and optimized for race conditions, leveraging cutting-edge technology to deliver elite performance.
- Offers customization options for riders to personalize their race machine while maintaining the aesthetics of a true competitor.
- A disruptive all-around race bike that redefines value in the high-performance road segment.

RIBBLE

AUDIENCE / COMPETITIVE CYCLIST

MEDIA BRANDS

Social media is a key source of inspiration, with riders following athletes, brands, and creators on platforms like Instagram, Strava, and YouTube.

This audience consumes media from outlets like Cycling Weekly, Rouleur, and GCN, focusing on racing, performance tech, and professional insights.

CYCLING BRANDS

Brands that resonate strongly with competitive cyclists include Trek, Canyon, Shimano, SRAM, and Garmin. Tools from Wahoo and nutrition products like Precision Fuel & Hydration are key brands in the daily routines

Media
Competitive cyclists rely on performance-focused outlets and tools that support their training and racing goals.

Brands
They demand proven products that align with their pursuit of speed, power, and elite-level performance.

Notes
Additional interest in tools like PCS, Garmin, and Precision Fuel & Hydration highlights their focus on measurable gains and professional-level preparation.

RIBBLE

AUDIENCE / ENDURANCE ENTHUSIAST OBSERVATIONS & OPPORTUNITIES

KEY OBSERVATIONS	IMPLICATIONS AND OPPORTUNITIES
Motivations to Ride: Riders are driven by competition, speed, and setting personal bests, prioritising performance above all else.	Position the Ultralight as the ultimate race bike for competitive riders. Highlight its aerodynamic efficiency, lightweight frame, and stiffness for unbeatable speed and power transfer.
High-Spending Rider Segments: **Competitors**: Focused on training and racing, they demand cutting-edge technology to enhance their performance. **Aspirational Buyers**: Enthusiasts drawn to the prestige and performance of professional-level equipment, even if not racing regularly.	Market the Ultralight as the pinnacle of race performance, blending elite-level tech with premium aesthetics to appeal to both serious competitors and aspirational enthusiasts.
Focus on Aerodynamics and Weight: Ultralight riders prioritise lightweight construction and optimised aerodynamics for gains in climbing, sprinting, and overall efficiency.	Showcase the Ultralight's sub-775g frame and aerodynamic design, proven through wind-tunnel testing, to dominate in race scenarios. Emphasise how these features deliver real-world performance advantages.
Competitive Edge and Credibility: Riders trust brands associated with professional racing and proven technologies. They are drawn to bikes that are UCI-approved and race-tested.	Use endorsements from professional riders, race results, and technical data to validate the Ultralight as a proven race machine. Focus on its credibility as a serious contender in competitive cycling..
Customisation and Prestige: Ultralight riders value personalisation, seeking customisable bikes that align with their racing goals and personal identity.	Highlight Ribble's custom build options, allowing riders to create a bespoke bike tailored to their racing ambitions. Emphasise its ability to deliver professional-level performance with a personalised touch.

RIBBLE

AUDIENCE / ENDURANCE ENTHUSIAST OBSERVATIONS & OPPORTUNITIES

KEY OBSERVATIONS

Media Consumption:
Follow cycling-specific media for tech updates and brand innovations.-
Preference for high-end brands without compromising technical credentials.

Product Needs:
Linear speed, dynamic speed, versatility, and utility across various race conditions.

IMPLICATIONS AND OPPORTUNITIES

Collaborate with leading cycling media to build credibility and highlight Ribble's quality and technical advancements.

Market Ultralights capabilities and innovative design,

RIBBLE

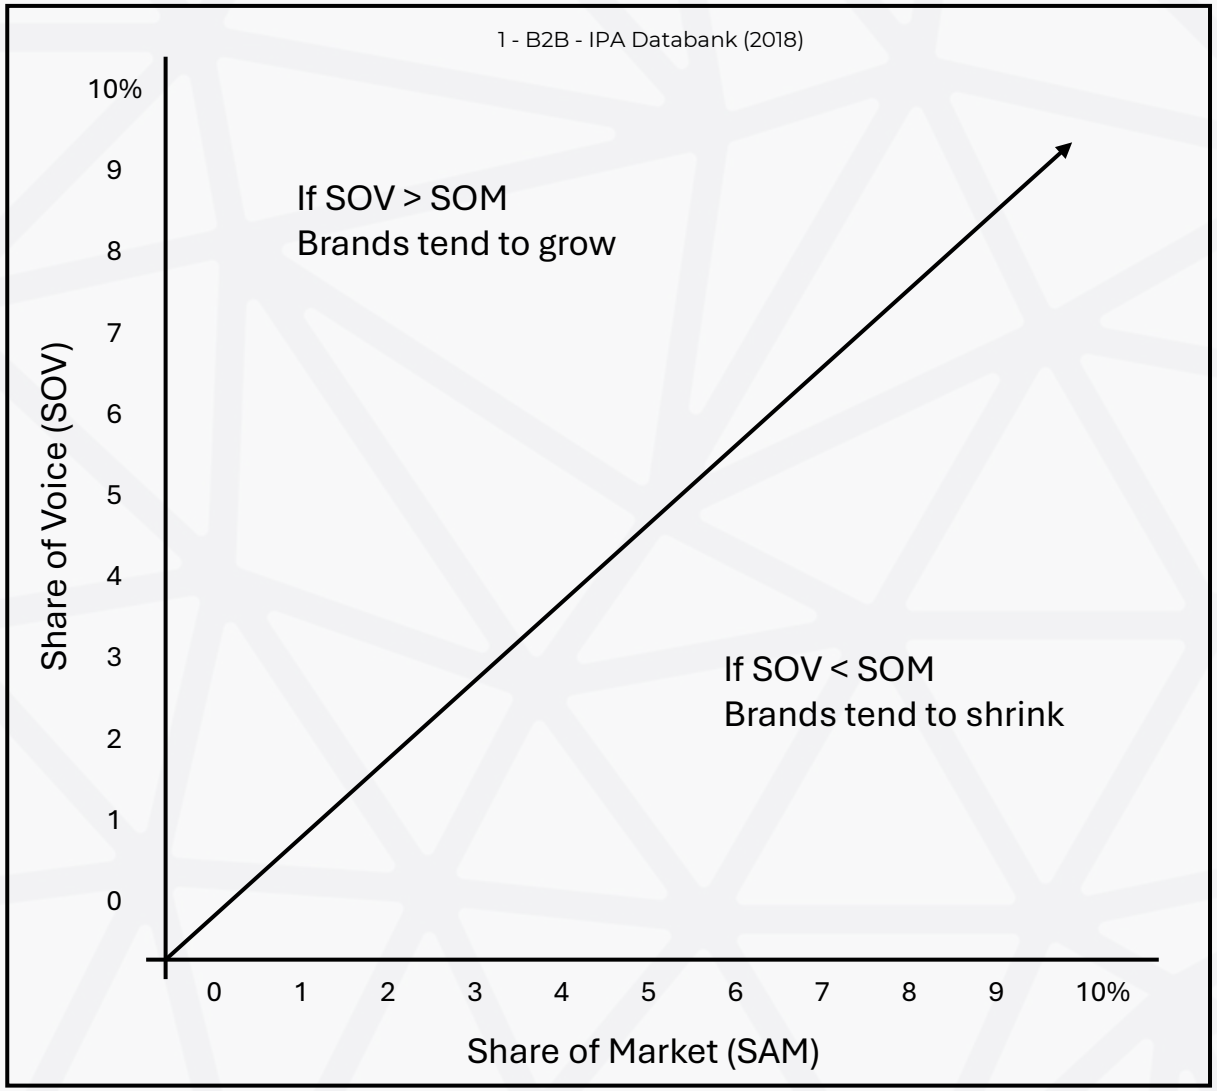
COMMS PRINCIPLES

RIBBLE

VISIBILITY IS CRITICAL TO GROWTH

Many factors contribute to the growth of product consideration and awareness. But across all categories and markets, the most predictive factor in growth is brand and product visibility, (brand ‘voice’).

Brands that have a share of voice higher than their share or market tend to grow. Those that have a lower share of voice will shrink.



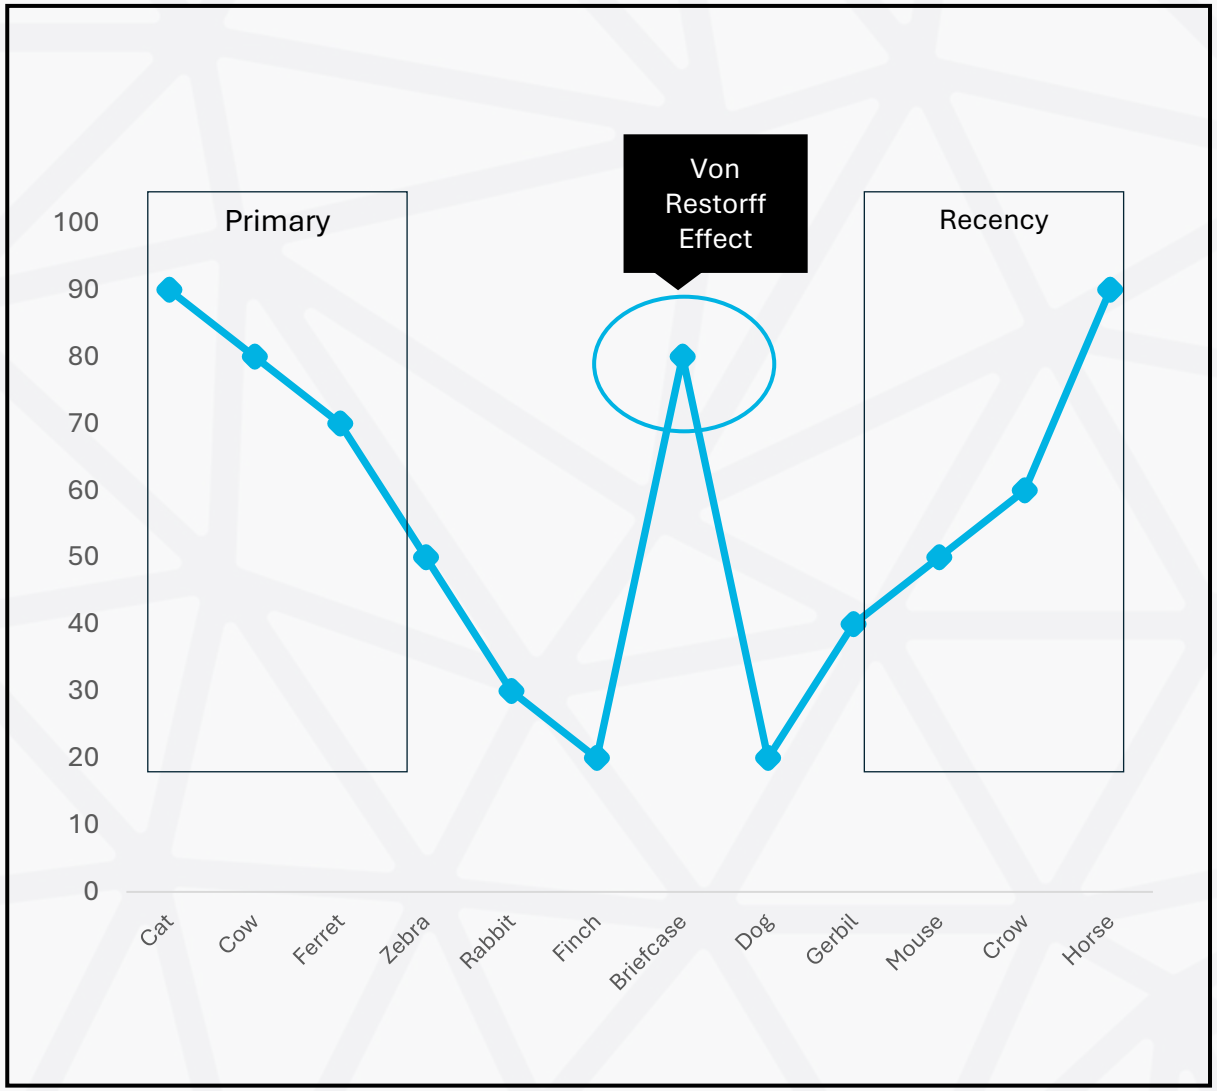
RIBBLE

NEW BRANDS & PRODUCTS NEED RICHER STORYTELLING CHANNELS

"Brand distinctiveness, is what really matters.
Not because it makes people appreciate the brand more but because it makes the brand easily identifiable and memorable."

Byron Sharp,
How Brands Grow

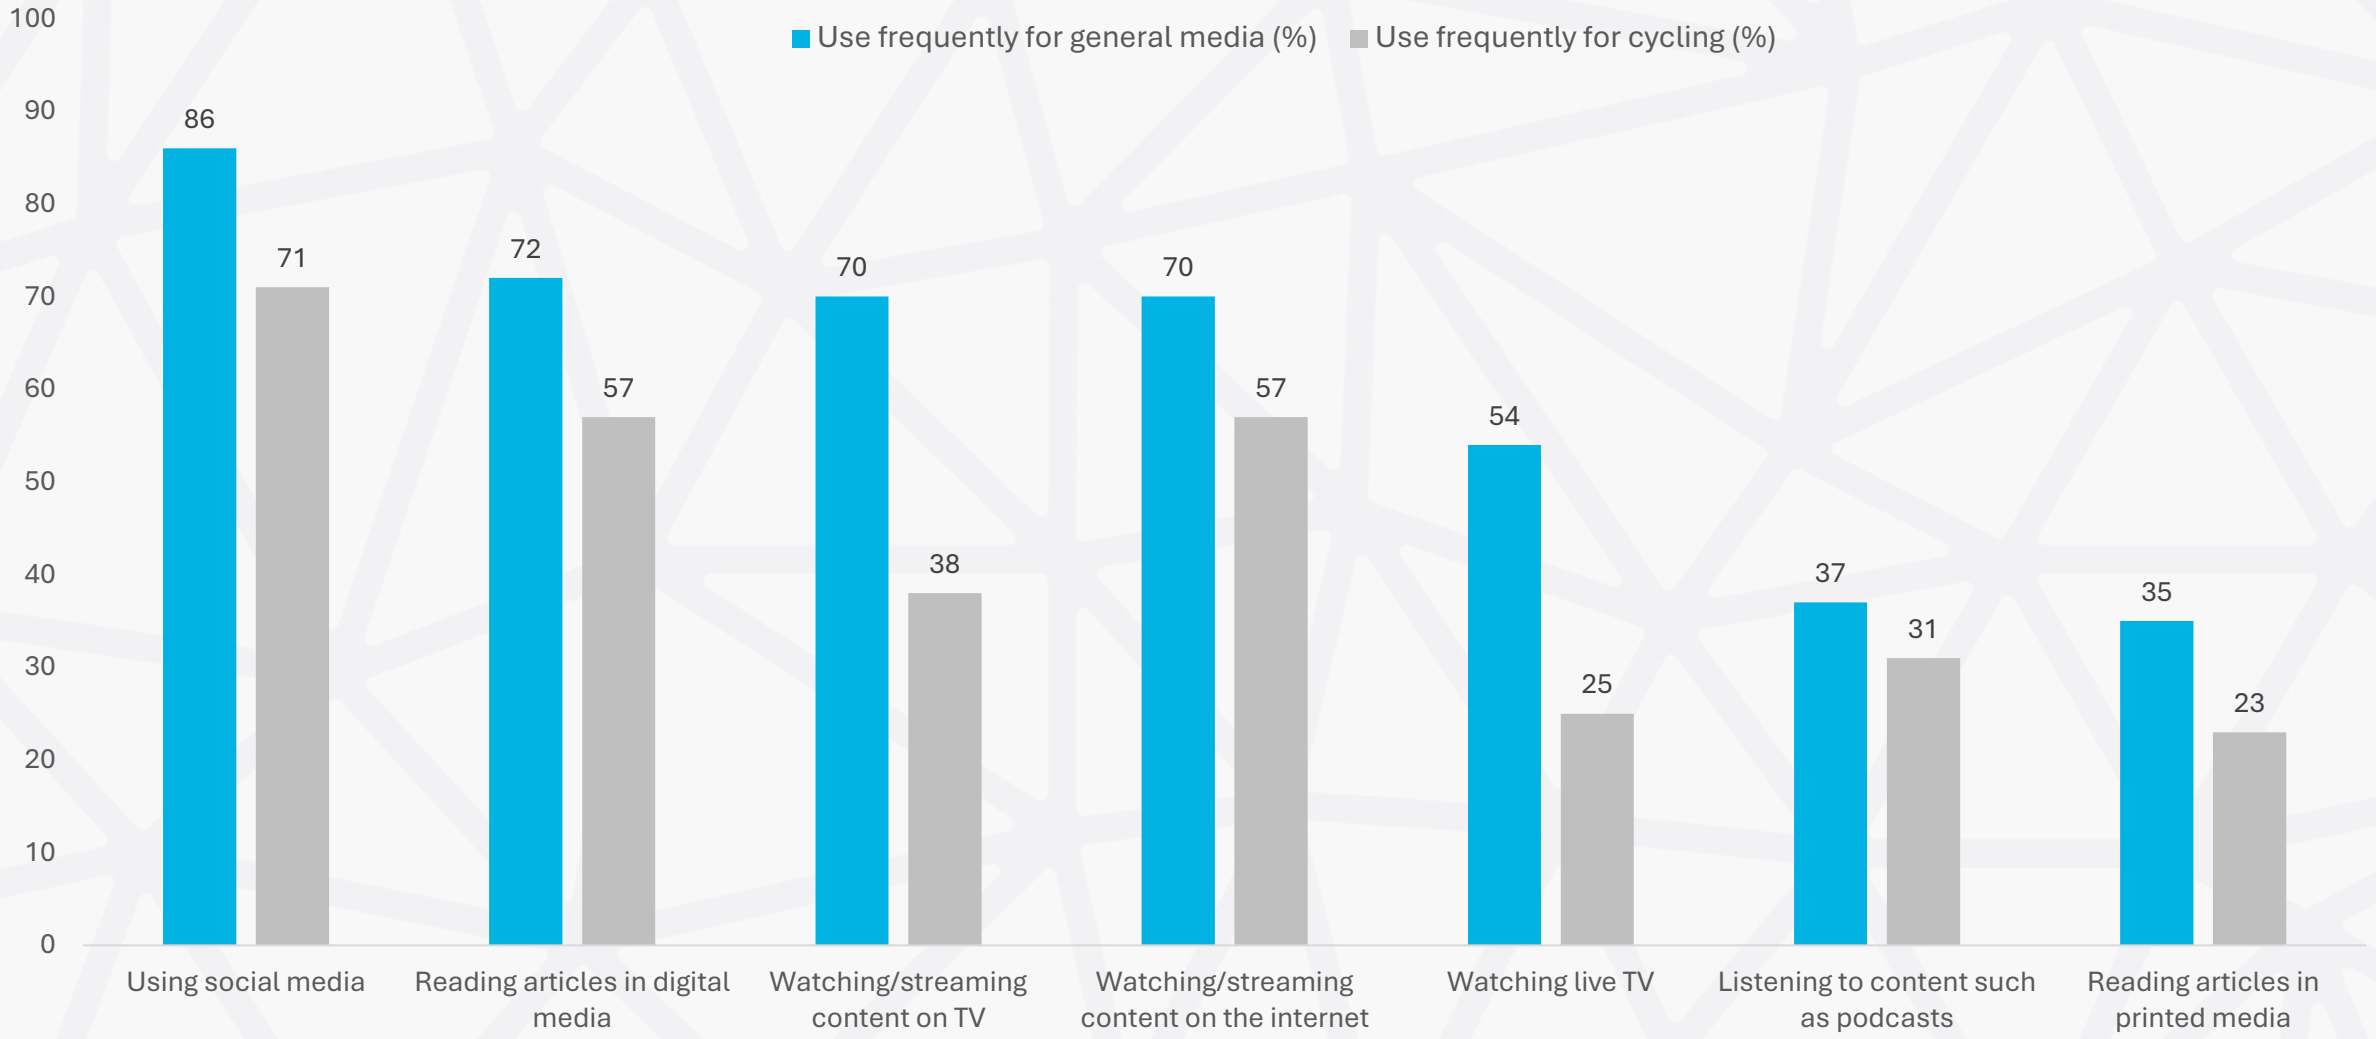
The Von Restorff Effect – when multiple similar things are presented, the one that differs from the rest is more likely to be remembered.



RIBBLE

CYCLIST CHANNELS // SOCIAL, DIGITAL CONTENT AND ENDEMIC ALL KEY TO REACHING AUDIENCE

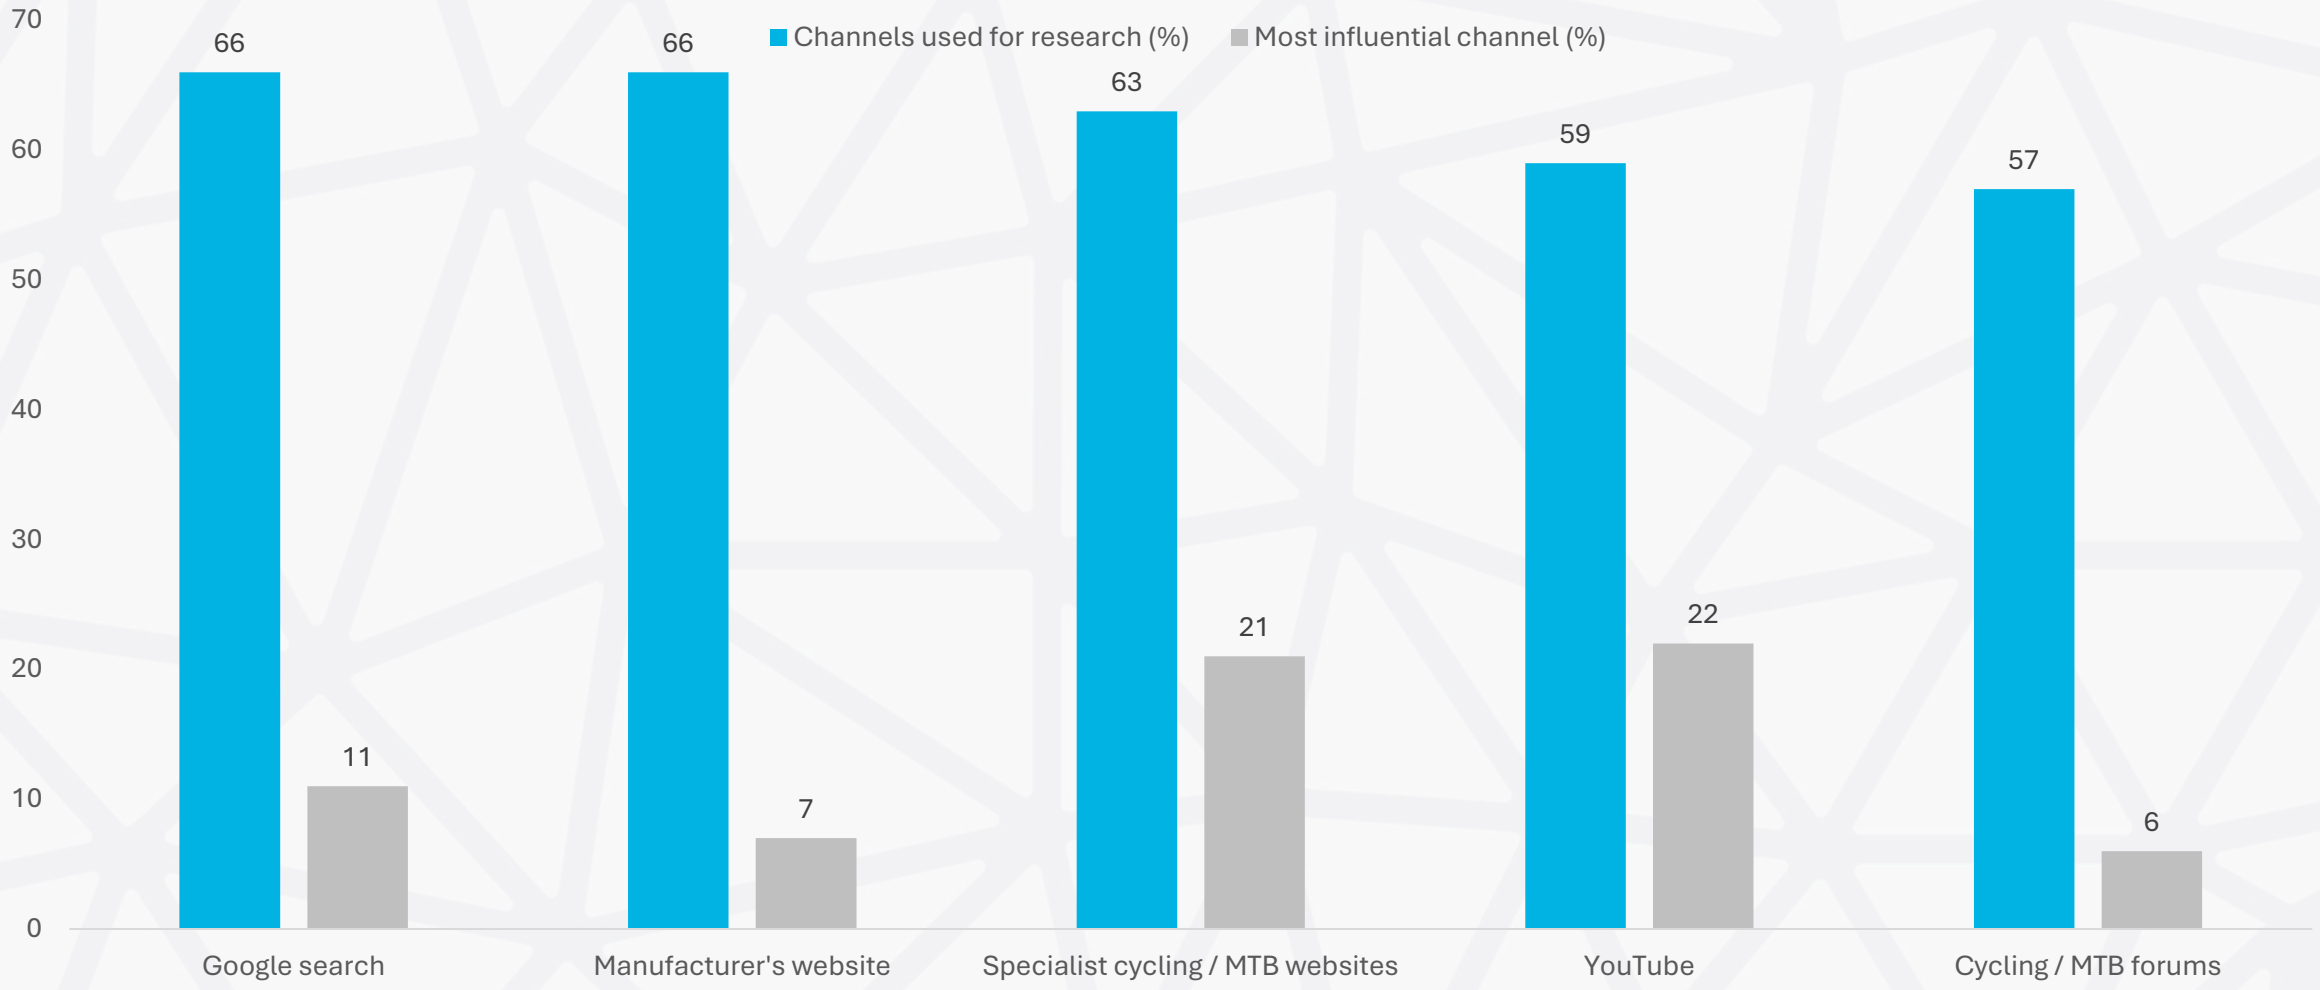
Use frequency for general media and use frequency for cycling



RIBBLE

CYCLIST CHANNELS // SOCIAL, DIGITAL CONTENT AND ENDEMIC ALL KEY TO REACHING AUDIENCE

Top channels used for research vs influential channels



RIBBLE

AUDIENCE / ENDURANCE ENTHUSIAST OBSERVATIONS & OPPORTUNITES

KEY OBSERVATIONS

Investment in reach (voice) is the most predictive factor when looking at which brands grow.

Whilst reach can be earned, there are limits to organic reach. Particularly consistent reach.

As a new and innovative product, it will be important to use channels that can support more in depth storytelling and brand building.

Website and search are important to ensuring visibility and clarity in the research journey. But endemic and YouTube create credibility.

IMPLICATIONS AND OPPORTUNITIES

Supporting ongoing organic and earned activity with paid reach is proven as the best way to grow a brand.

Online video, Social media and Endemic media offer the most affordable and effective channels to drive brand consideration.

A product needs to ensure a foundation of quality, but PR coverage and endemic partnerships are key to convincing riders that the Ultralight is a quality product.

RIBBLE

GUIDING STRATEGY / PRINCIPLES

RIBBLE

GTM STRATEGY | DIAGNOSIS

SIGNIFICANTLY GROW ULTRALIGHT'S PRESENCE AND DESIRABILITY AMONGST ENTHUSIAST ENDURANCE RIDERS

To successfully grow the Ribble Ultralight Series and maintain performance-driven positioning:

We must increase awareness of the model, and establish the Ultralight as the ultimate all-round race bike, built to dominate climbing, sprinting, and descending - the Triple Threat. Unlike other race bikes, the Ultralight excels at all three, making it the definitive choice for riders who refuse to compromise on performance.

To achieve this, We will position the Ribble Ultralight as the best all-round race bike we've ever built - a bike designed to conquer every part of the race, from relentless climbs to explosive sprints and fearless descents. This means focusing our messaging on performance superiority and reinforcing the Triple Threat advantage.

TACTICS

- **Own the Triple Threat positioning** and elevate the Ultralight's identity as an elite race bike.
- **Leverage Influencers, Ambassadors and Pro Teams** to validate it's superiority.
- **Showcase Our Engineering excellence** and the bikes position as a world's first from a materials technology perspective.
- **Improve User Experience** and Ensure clarity across product pages, content, and social channels.
- **Optimise The Positioning** by Differentiating from endurance and specialist bikes
- **Optimise The Sales Journey** by creating a seamless, high-impact buying experience aligned with the mindset of performance riders.

RIBBLE

GUIDING STRATEGY / PRINCIPLES

THE ULTIMATE ALL-ROUND RACE BIKE
The Ribble Ultralight is built for pure racing excellence, excelling in climbing, sprinting, and descending; the Triple Threat. It delivers lightweight precision, aerodynamic efficiency, and absolute control, ensuring dominance in every race scenario without compromise.

STAND OUT
The Ultralight is more than just fast; it’s a statement of superiority. Race focused, progressive design and performance-driven engineering, it captures attention and sets itself apart. High-impact content and storytelling and enriched media will reinforce its status as a must-have race machine.

MAKE IT REAL TO MAKE IT CREDIBLE
Proven in competition, the Ultralight's capabilities will be showcased in real-world racing environments. From alpine ascents to explosive criteriums. Authentic rider experiences and professional validation will reinforce its performance pedigree.

PREMIUM FOUNDATIONS
Positioning the Ultralight as an elite race bike requires a seamless user experience across digital, retail, and social platforms. Engaging product pages, expert reviews, and high-production content will build trust and reinforce its premium status.

INVEST TO REACH & TELL THE STORY
Building awareness through targeted media, athlete partnerships, and PR, we’ll share powerful stories of riders pushing their limits with the Ultralight. Strategic campaigns will inspire competitive cyclists to choose the Triple Threat advantage.

FOCUS FOR IMPACT
Targeting key race moments and high-profile events will amplify visibility. Seasonal campaigns, PR activations, and content synchronisation will ensure the Ultralight reaches riders who demand the fastest, most capable race bike available.

RIBBLE

GUIDING STRATEGY / PRODUCT PROPOSITION

PRODUCT INSIGHT

The Ribble Ultralight is the ultimate all-round race bike, excelling in climbing, sprinting, and descending; the Triple Threat.

A sub-775g frame, race-optimised aerodynamics, and unmatched stiffness ensure every watt of power is converted into speed. Designed for those who race and refuse compromise.

AUDIENCE INSIGHT

For riders chasing KOMs, PBs, and podiums, you don’t just complete, you compete, and the Ultralight gives you an edge.

Whether attacking climbs, unleashing your sprint, or descending with precision, this bike amplifies your strengths.

It’s not about riding, it’s about riding fast.

CREATIVE PROPOSITION

The best all-round race bike we’ve ever built, the Ultralight dominates every race-winning element.

Most bikes compromise, the Ultralight rules them all.

A true Triple Threat engineered to conquer climbs, excel in sprints, and descend with absolute control. Ride to win.

NO COMPROMISES.
UNTOUCHABLE ON CLIMBS.
UNRIVALLED IN SPRINTS.
UNSTOPPABLE ON DESCENTS.

RIBBLE

EMOTIONAL

EMOTIONAL BENEFIT

*"**SUPERIORITY**" The Ribble Ultralight delivers what every ride demands.*
This is the power of the "Triple Threat," it sets you apart, ensuring you're ready to perform – everywhere

PROPOSITION
NO COMPROMISES
Untouchable on climbs. Unrivalled in sprints. Unstoppable on descents.

PROPOSITION TWO
BUILT FOR THOSE WHO RACE
Climb faster. Sprint harder. Descend with confidence.
The Best of All Worlds

BENEFITS

CLIMB

The featherlight sub-775g frame propels you to the front on steep gradients, maximizing efficiency on every climb.

SPRINT

Aerodynamically optimised shaping and exceptional stiffness ensure every watt of power is converted into raw, race-winning speed.

DESCEND

Pro-tuned geometry and precise handling deliver unmatched stability and control, even on the most technical descents.

PERFORMANCE ENGINEERING

No excess, no compromise; just precision engineering designed to amplify speed, efficiency, and control.

RATIONAL

RTBS

- Featherlight construction delivers effortless acceleration on every gradient.
- Optimised carbon layup maximizes efficiency without sacrificing strength.

- Refined stiffness-to-weight ratio transforms power into pure acceleration.
- Aerodynamic tube shaping reduces drag for explosive speed gains.

- Race-tuned geometry keeps you planted and stable.
- Precise handling ensures control through every corner and technical descent.

- Advanced carbon layup balances stiffness, compliance, and weight perfectly.
- Seamless integration reduces drag and enhances real-world efficiency.

RIBBLE

GUIDING STRATEGY / PRINCIPLES

THE ULTIMATE ALL-ROUND RACE BIKE
The Ribble Ultralight is built for pure racing excellence, excelling in climbing, sprinting, and descending; the Triple Threat. It delivers lightweight precision, aerodynamic efficiency, and absolute control, ensuring dominance in every race scenario without compromise.

STAND OUT
The Ultralight is more than just fast; it’s a statement of superiority. Race focused, progressive design and performance-driven engineering, it captures attention and sets itself apart. High-impact content and storytelling and enriched media will reinforce its status as a must-have race machine.

MAKE IT REAL TO MAKE IT CREDIBLE
Proven in competition, the Ultralight's capabilities will be showcased in real-world racing environments. From alpine ascents to explosive criteriums. Authentic rider experiences and professional validation will reinforce its performance pedigree.

PREMIUM FOUNDATIONS
Positioning the Ultralight as an elite race bike requires a seamless user experience across digital, retail, and social platforms. Engaging product pages, expert reviews, and high-production content will build trust and reinforce its premium status.

INVEST TO REACH & TELL THE STORY
Building awareness through targeted media, athlete partnerships, and PR, we’ll share powerful stories of riders pushing their limits with the Ultralight. Strategic campaigns will inspire competitive cyclists to choose the Triple Threat advantage.

FOCUS FOR IMPACT
Targeting key race moments and high-profile events will amplify visibility. Seasonal campaigns, PR activations, and content synchronisation will ensure the Ultralight reaches riders who demand the fastest, most capable race bike available.
